

Experience

Full Time

Jan 2026- **Applied Scientist 3**, Glance, Bangalore.

Present ○ **Surface Art - Recommendation**

1. Built and deployed a weak-supervision ML framework for user profile attributes, launching Topwear Price Range prediction and improving accuracy from 58% LLM baseline to 65% and templatised the entire flow to help faster integration for the engineers.
2. Led the optimisation and productionisation of user profiling pipelines, leveraging cross-domain behavioral signals to improve personalization quality and system efficiency.
3. Architected and developed the memory system powering Glance AI chat, enabling persistent user understanding and more context-aware recommendations.
4. Co-authored a paper on user profile system design, accepted at **UMAP 2026**.

○ **MLE 3 (Jan 2025-Dec 2025) - Product Search**

1. Developed an image-based product search system that performs image segmentation to extract individual products and matches them using embeddings against a database of over 18 million indexed items across multiple geographies.
2. Developed end to end pipeline that recommends similar products based on product information in the product details page.
3. Published the working of search system as a paper in **CODS 2025** and got awarded as **best paper in demo track** -Link

Jan 2023- **Machine Learning Engineer 2**, Glance, Bangalore.

Dec 2024 ○ **Novo - Applied AI**

1. Worked on a team of four in developing Lex an smart AI content creation tool for text, images and videos. It helps in reducing content creation time by 1/3rd and used across regions like Asia, Europe, and America powering more than 2000 content per day.
2. Worked on Classification algorithms to deduce the quality and category of AI Generated articles.

Sep 2021- **Machine Learning Engineer 1**, Glance, Bangalore.

Jan 2023 ○ **Recommendation**

1. Developed and Deployed a User level Logistic regression model for recommendation of glances over 38 million users with a positive delta on time spent 10 percent.
2. Developed data pipelines and dashboards to track the performance of the recommendation models for over 180 million users.

○ **MLOps - Central Tech**

1. Experimented with multiple Video compression algorithms from bit rate compression to deep learning algorithms to reduce video content size by 40 percent.
2. Implemented cloud-based alerts for dataproc provisioning and vertex pipeline monitoring to optimize costs.

- May 2021- **Machine Learning Engineer**, Chefing Inc, Bangalore.
- August 2021
- Pretrained a domain-specific corpus, on a BERT based transformer model to use it as a embedding layer for ML tasks.
 - Created an end to end pipeline, to tag the recipe's nutritionally based on the ingredients.
 - Collaborated with product, backend and designed the structure of in-house nutrition database and procured the data for the same.

Internship

- Jan 2021- **R&D Engineer Trainee**, IN-D Power of AI, Chennai.
- May 2021
- Product owner of NLP-based Insurance product and reported directly to the CTO.
 - Deployed various machine learning models and feature engineering techniques for classification for ICD and CPT coding of medical documents.
 - Improved the accuracy of the model from 70% to 90%.
- June 2020- **R&D Engineer Trainee**, IN-D Power of AI, Chennai.
- July 2020
- Part of the core research team in developing a KYC and insurance verification system.
 - Implemented multiple convolutional neural network models in order to segment and classify the real time images with an F-measure above 95%.
- May 2019- **Intern**, LatentView Analytics, Chennai.
- Dec 2019
- Developed an AI-powered application using the concepts of Natural Language Processing and Deep Learning that intuitively understands articles and provides the information in short.
 - Developed a tool for automating the resume screening process using python.
 - Worked on time series forecasting using Alteryx in order to predict the employee exit rate.

Education

- 2016-2021 **Integrated M.Sc Data Science**, PSG College of Technology, Coimbatore, CGPA 8.3/10
- 2016 **Class 12**, K.C.A.D Chidambaram Gnanigiri Matriculation Higher Secondary School, Sattur, 91.75% (State Board)
- 2014 **Class 10**, K.C.A.D Chidambaram Gnanigiri Matriculation Higher Secondary School, Sattur, 98.75 (Matriculation)

Technical Skills / Interests

- Programming Languages Python, C, C++, ReactJs, Java, R
- Tools and Libraries Pyspark, DataStudio, Tableau, Keras, Docker, Tensorflow, Flask, FastAPI, GCP, AWS, Mat-lab
- Database Management MySQL, MongoDB, Pinecone
- Areas of Interest Data Science and Engineering
